### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jim Muldoon on 7/20/05. This examiner amendment is being made to overcome new art found in class 174.

The application has been amended as follows: **Revise claims 1, 26 and 32 as shown below.**

1. (Currently Amended) ~~An enclosure for an electronic device~~ A filter assembly for use in a CATV system comprising:
- a) a hollow body member for housing ~~an electronic device~~ a filter circuit said member having a central axis and opposite ends;
  - b) a filter circuit housed within said body member;
  - c) a header having a central axis and a threaded connector longitudinally adjoining one of said ends in coaxial relation; and
  - e)d) a notch in one of said body member and header and a tab on the other of said body member and header, said tab extending into said notch to rotationally lock said body member and said header to one another.

26. (Currently Amended) The method of fabricating and assembling ~~an~~ a filter assembly for use in a CATV system comprising:

- a) forming a hollow, cylindrical body member having a central axis, a body diameter and first and second ends in parallel planes;
- b) forming a first header having an annular portion;
- c) forming an axially extending notch at the first end of the body member substantially equal in diameter to the body diameter;
- d) forming an axially extending tab on the annular portion of the first header substantially equal in diameter to the body diameter;
- e) housing a filter circuit within said body member; and
- ~~e)f~~ slip fitting the tab on the header into the notch in the end of the body member to rotationally lock the header to the body member.

32. (Currently Amended) ~~An~~ A filter assembly for use in a CATV system comprising

- a) a hollow body member having a central axis, a body diameter and opposite ends in parallel planes, the body member having an axially extending notch at one end substantially equal in diameter to the body diameter; ~~and~~
- b) a filter circuit housed within said body member; and
- c) a header having a central axis longitudinally adjoining one of the ends in coaxial relation, the header having an axially extending tab substantially equal in diameter to the body diameter and configured to slip fit into the notch,

whereby the header and body member become rotationally locked in a slip fit assembly.

2. The following is an examiner's statement of reasons for allowance: Reasons for allowance of claims 7, 11 and 16 were given in the previous office action. The combination in claims 1, 26 and, 32 specifically the filter circuit contained in a housing having a tab and notch locking arrangement. See the discussion below of additional prior art found that do not read on the applicant's claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller teaches a hollow body member with a notch and tab but no filter circuit and no locking arrangement with the notch and tab. Lukas et al teaches a hollow body member and header but no filter circuit or notch/tab locking arrangement. Weagant teaches a hollow body member with a notch and tab locking arrangement but no filter circuit.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Zarroli whose telephone number is 571-272-2101. The examiner can normally be reached on 7:30 to 3:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.C. Patel can be reached on (571) 272-2800 ext 39. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
